

Visual Environmental Protection RF Shielding Room

Visual and environmental protection shielding room has realized industrial manufacturing, rapid installation on site, no need independent special air conditioning, no environmental pollution, to maximize the visual and barrier-free communication between doctors and patients.

Advanced R&D System

The system adopts the concept of compact energy-saving design. 5 Gauss line is controlled within 2 meters of the magnet center, and the shielding Room only needs 25 square meters, and the total system demand is only 40 square meters. Optimize the occupying space and solve the problem of insufficient space in the imaging department of the hospital.

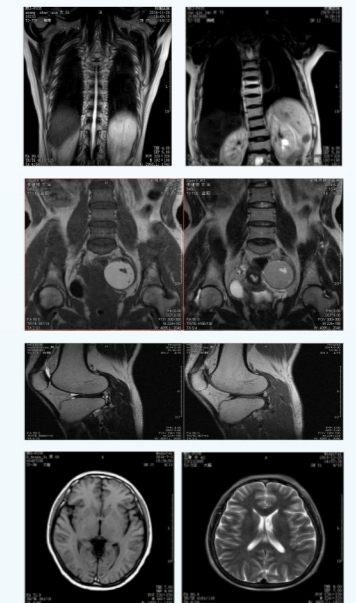

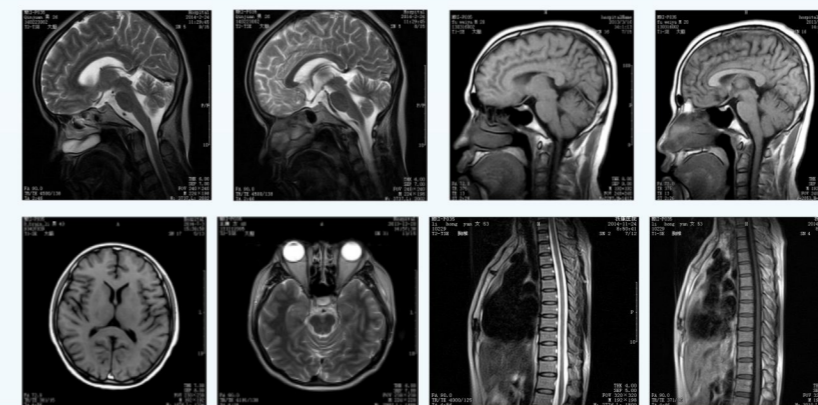

Low Cost and High Cost Performance

Landcom brand 0.35T MRI system is characterized by high cost performance, low cost, mature technology, clear image and stable operation.

Friendly User Interface

In addition to normal functions, the user interface also includes diagnostic report features, image printing function, diagnostic image printing function, operation and diagnostic help function.

Professional After-sales Service

Ensure the low cost, safe and efficient operation of customers' equipment. With quick installation, timely after-sales response and complete training program.
